## CHAPTER I - INTRODUCTION

## FINAL REPORT

This report summarizes the results of a survey administered from October 5, 2010 to October 15, 2010 for the Chief Administrative Officer of the U.S. House of Representatives on compensation, employment, organizational structure, benefits, and other office practices of House Member personal offices. The Web-based survey was sent to 440 Representatives' offices; the remaining office was not contacted because the Chief of Staff position was vacant at the time of survey administration. A total of 133 (30.2\%) offices provided responses to the survey.

The next seven chapters are as follows:
■ Chapter II: Hiring and Compensation Practices - summarizes the education, compensation, and experience qualifications of office staff in 15 core positions. Of the 15 positions, two were added to the 2010 survey and thus we do not have 2009 or 2006 data available on these. These include Financial Administrator and Systems Administrator.
■ Chapter III: Organizational Structure - describes the typical organizational structures used in Washington, D.C. and District offices as well as the positions that perform specialized functions (i.e., Emergency Coordinator, Green Office Coordinator, Financial Administrator, Systems Administrator).

- Chapter IV: Benefits - summarizes Members' office policies related to pay increases, leave, student loan repayments, flexible work arrangements, and district work periods.
- Chapter V: Performance Appraisal/Evaluations - summarizes the most commonly-used appraisal/evaluation practices and the frequency with which they are performed.
- Chapter VI: Other Office Practices - discusses office practices including providing a procedure manual, developmental opportunities, dress code, wellness activities, new employee orientation, foreign languages, constituent demographics, cultural, ethnic, or religious events/holidays, diversity recruitment, and office hours.
- Chapter VII: Recruitment and Retention - lists the most common recruitment sources for each core position, information on turnover for each position, and the most common reasons cited for leaving the organization.
■ Chapter VIII: The Impact of Employment Practices - shows the results of analyses relating various office practices and outcomes. The relationships between benefits, office size, and turnover are displayed. Additionally, differences in the extent of turnover problems between offices that offer and do not offer certain flexible work arrangements and developmental opportunities are depicted.

## How to Use the Report

The purpose of this report is to provide Member offices with information on the typical compensation and benefits policies employed by other Member offices. Where possible, 2010 responses are compared to 2009 and 2006 responses. For response options that changed in the 2010 survey, "N/A" is indicated for the 2009 and 2006 data.

The response rate for this survey was $30.2 \%$, which is considered a strong response rate for a Web survey. ${ }^{1}$ To achieve this response rate, the project team placed heavy emphasis on an outreach campaign to contact and assist offices and encourage participation during survey administration. The results are representative of practices across the House, but they may not represent the full spectrum of practices in Member offices. In addition, the response rate for specific questions may be lower than the overall 2010 response rate of $30.2 \%$ because not all offices answered every question.

## CHAPTER VIII - IMPACT OF EMPLOYMENT PRACTICES

## BENEFITS, OFFICE SIZE, AND TURNOVER

This section illustrates relationships between benefits, office size and problems with turnover.

Offices that provide higher average student loan repayments tend to report fewer problems with turnover than offices that provide lower average student loan repayments. Although not statistically significant, offices with longer maximum allowances for bereavement, FMLA, and sick leave also reported fewer problems with turnover.

Note: The relationship between monthly student loan repayment and turnover is statistically significant ( $p<.05$ ). Relationships between turnover and other benefits policies are not statistically significant.

Offices that offer higher lump sum bonuses, salary increases, and COLA increases tend to be smaller than offices that offer lower pay increases.

Note: These relationships are reported due to their directional nature, though the results were not statistically significant.

Larger offices tend to offer longer maximum allowances for FMLA leave than smaller offices, whereas smaller offices tend to offer longer maximum allowances for sick leave than larger offices.

Note: These relationships are reported due to their directional nature, though the results were not statistically significant.

## FLEXIBLE WORK ARRANGEMENTS AND TURNOVER

This section illustrates how flexible work arrangements relate to problems with turnover.

Offices that provide flexible work arrangements reported fewer problems with turnover than offices that do not provide any type of flexible work arrangements.

Note: The mean difference between offices that offer flexible work arrangements and those that do not offer the arrangements is statistically significant ( $p<.05$ ).

For each of the specific types of flexible work arrangements (i.e., flex time, telecommuting, and parttime work), offices reported fewer problems with turnover across each of these compared to offices that do not offer these arrangements.

Note: The mean difference between offices that offer telecommuting and those that do not is statistically significant ( $p<.05$ ). Mean differences for flex time and part-time work are not statistically significant.

## DEVELOPMENTAL OPPORTUNITIES AND TURNOVER

This section illustrates how the availability of developmental opportunities relates to problems with turnover.

Offices that provide opportunities for employees to attend off-site training, formal on-the-job training, and on-site training reported fewer problems with turnover compared to offices that do not provide these developmental opportunities.

Note: Mean differences between offices that offer off-site training and between offices that offer formal onthe job training and offices that do not offer either of these are statistically significant ( $p<.05$ ) whereas the mean difference between offices that offer on-site training and offices that do not offer on-site training was not found to be statistically significant.
