The statutory debt limit was reinstated on December 9, 2017, at a level that precisely accommodated the federal borrowing undertaken to that date. On December 11 and 12, 2017, [Secretary Mnuchin announced](#) that the Treasury would implement "extraordinary measures" that delay when the debt limit will bind. Additionally, on December 8, 2017, the [Bureau of the Fiscal Service suspended sales of certain Treasury securities](#) to extend the Treasury's ability to meet statutory spending requirements without defaulting on its debt obligations. This Insight briefly examines the debt limit and the use of extraordinary measures, and will be updated periodically to reflect changes in the status of federal borrowing.

What Is the Debt Limit?

As part of its "power of the purse," Congress uses the statutory debt limit (codified in 31 U.S.C. §3101) as a means of restricting federal debt. Debt subject to the limit is more than 99% of total federal debt, and includes debt held by the public (which is used to finance budget deficits) and debt issued to federal government accounts (which is used to meet federal obligations). The debt limit acts as a congressional check on recent revenue and expenditure trends, though decisions affecting debt levels may have been agreed to by Congress and the Administration well in advance of debt limit deliberations. Some past debt limit legislation has linked debt limit increases with other fiscal policy proposals.

What Are Extraordinary Measures?

Extraordinary measures represent a series of actions that postpone when Congress must act on debt limit legislation. The authority for using extraordinary measures rests with the Treasury Secretary (codified in 5 U.S.C. §8348 and 5 U.S.C. §8909). Invoking extraordinary measures has delayed required action on the debt limit by periods ranging from a few weeks to several months, depending on when such measures were enacted (see the "[How Long Do Extraordinary Measures Last?](#)" section). Accounts and members of the public that are affected by extraordinary measures must be compensated for the delay in payment that resulted from such actions when the debt limit is subsequently modified.

Congressional Operations Briefing— Capitol Hill Workshop

Congressional Operations Briefing and Seminar

The definitive overview of how Congress works.

This intensive course is offered as a
3-day public Briefing and as a tailored
on-site 3, 4 or 5-day program.

Public Briefings are offered throughout the year in Washington, DC.
Space is limited.

Dates, Agenda, Previous Faculty, and Secure Online Registration:

On December 12, 2017, the [Treasury announced](#) the extraordinary measures that are currently available. The Fiscal Service suspended issuance of State and Local Government Securities on December 8. A Debt Issuance Suspension Period was invoked on December 11, suspending new investments and redeeming certain existing investments of the [Civil Service Retirement and Disability Fund](#) and the Postal Service Retiree Health Benefits Fund. On December 12, the Treasury suspended daily reinvestment of securities held in the [G Fund](#). Similarly, the Treasury may suspend daily reinvestment of Treasury securities held in the Exchange Stabilization Fund.

[Table 1](#) provides a description of the extraordinary measures used the last three times those measures were implemented. The Treasury estimates that the current implementation of extraordinary measures will provide \$242.7 billion in headroom plus \$7.3 billion every month that a Debt Issuance Suspension Period is declared.

Table 1. Use of Extraordinary Measures, 2015-2018

Measure	Headroom Added in 2017-2018	Headroom Added in March 2017	Headroom Added in March 2015
Suspension of reinvestment in Government Securities Investment Fund (G Fund) of the Federal Retirement System	\$208 billion	\$225 billion	\$195 billion
Suspension of invested balance in Exchange Stabilization Fund	\$22 billion	\$23 billion	\$22 billion
Declaration of a Debt Issuance Suspension Period	\$12.7 billion one-time and \$7.3 billion per month	\$87 billion one-time and \$7.3 billion per month	\$65 billion one-time and \$6.8 billion per month
Suspension of State and Local Government Securities	\$0 (prevents further increases in debt by \$3 - \$13 billion per month)	\$0	\$0

Notes: In a January 2018 report, the Congressional Budget Office estimated that an additional \$3.5 billion of headroom is available through the Federal Financing Bank. This table only includes available measures reported by the Treasury.

How Long Do Extraordinary Measures Last?

Short-term fluctuations in federal debt levels provide for substantial uncertainty in how long extraordinary measures can last. Federal balances fluctuate on a day-to-day basis in response to a number of factors, including the timing of payments for Social Security, military benefits, and other programs; interest payments on debt obligations; and the timing of certain receipts. [Figure 1](#) shows federal daily balances to date in FY2018. The reduced variation in daily balances starting in December 2017 reflects the implementation of extraordinary measures.

Figure 1. Daily Federal Balances, October 3, 2017 – January 30, 2018

Source: U.S. Department of Treasury, *Daily Treasury Statement* (various).

Notes: Positive numbers indicate daily surpluses, while negative numbers indicate daily deficits.

Monthly budget outcomes can also fluctuate with the timing of various activities. The federal government tends to record higher net budget surpluses in April (when many individual tax returns are filed) and September (as certain payments are due at the end of the fiscal year) while recording lower balances in other months. [Figure 2](#) presents the average federal monthly account balances from the previous five fiscal years. Data points outside the circle indicate months that have recorded average surpluses from FY2013 through FY2017; points inside the circle represent months that have recorded average deficits in those years.

A [January 31, 2018 CBO report](#) projected that extraordinary measures will be exhausted in the first half of March 2018. That is an earlier projection than indicated in a [November 2017 CBO report](#); the difference is largely due to the passage of the 2017 tax revision ([P.L. 115-97](#)), which reduced revenues collected in 2018. Secretary Mnuchin indicated in a [January 30, 2018, letter](#) to Congress that the debt issuance suspension period was being extended through February 28, 2018.

Source: U.S. Department of Treasury, *Monthly Treasury Statement* (various), and Federal Reserve Bank of St. Louis Economic Research (FRED), *Total Federal Outlays* and *Total Federal Receipts*. CRS calculations.

Notes: Data points outside the circle represent average monthly surpluses; points inside the circle represent average monthly deficits. Monthly figures are in nominal dollars.

Learn how Capitol Hill really works

All of our programs and any combination of their topics can be tailored for on-site training for your organization.

For more than 40 years, TheCapitol.Net and its predecessor, Congressional Quarterly Executive Conferences, have been teaching professionals from government, military, business, and NGOs about the dynamics and operations of the legislative and executive branches and how to work with them.

Our custom, on-site training and publications include congressional operations, legislative and budget process, communication and advocacy, media and public relations, research, testifying before Congress, legislative drafting, critical thinking and writing, and more.

- **Diverse Client Base**—We have tailored hundreds of custom on-site training programs for Congress, numerous agencies in all federal departments, the military, law firms, lobbying firms, unions, think tanks and NGOs, foreign delegations, associations and corporations, delivering exceptional insight into how Washington works.™
- **Experienced Program Design and Delivery**—We have designed and delivered hundreds of custom programs covering congressional/legislative operations, budget process, media training, writing skills, legislative drafting, advocacy, research, testifying before Congress, grassroots, and more.
- **Professional Materials**—We provide training materials and publications that show how Washington works. Our publications are designed both as course materials and as invaluable reference tools.
- **Large Team of Experienced Faculty**—More than 150 faculty members provide independent subject matter expertise. Each program is designed using the best faculty member for each session.
- **Non-Partisan**—TheCapitol.Net is non-partisan.
- **GSA Schedule**—TheCapitol.Net is on the GSA Schedule, 874-4, for custom on-site training: GSA Contract GS02F0192X.

Please see our Capability Statement on our web site at TCNCS.com.

Custom training programs are designed to meet your educational and training goals, each led by independent subject-matter experts best qualified to help you reach your educational objectives and align with your audience.

As part of your custom program, we can also provide classroom space, breaks and meals, receptions, tours, and online registration and individual attendee billing services.

For more information about custom on-site training for your organization, please see our web site: TCNCustom.com or call us: 202-678-1600, ext 115.
