## House Committee Staff Pay, Selected Positions, 2001-2021

The level of pay for congressional staff is a source of recurring interest among Members of Congress, congressional staff, and the public. There may be interest in congressional pay data from multiple perspectives, including assessment of the costs of congressional operations; guidance in setting pay levels for staff in committee offices; or comparison of congressional staff pay levels with those of other federal government pay systems.

This report provides pay data for the following 14 staff position titles that are used in House committees: Chief Counsel; Clerk; Communications Director; Counsel; Deputy Staff Director; Digital Director; General Counsel; Minority Professional Staff Member; Professional Staff Member; Senior Counsel; Senior Professional Staff Member; Staff Assistant; Staff Director; and Subcommittee Staff Director. The following table provides 2021 pay levels and the change in median pay levels for these positions in constant 2022 dollars, between 2020 and 2021.

**Table I. 2021 Median Pay and Percentage Change for Selected Staff Positions in House Committees, 2022 Dollars and Percentage Change, 2020-2021**

Position	2021 Pay, Constant 2022\$	Change, 2020-2021	Position	2021 Pay, Constant 2022\$	Change, 2020-2021
Chief Counsel	\$185,954	0.84%	Minority Professional Staff Member	\$123,449	-16.61%
Clerk	\$87,702	1.47%	Professional Staff Member	\$114,248	0.91%
Communications Director	\$150,973	-2.63%	Senior Counsel	\$150,703	-1.26%
Counsel	\$133,016	16.20%	Senior Professional Staff Member	\$160,683	-3.22%
Deputy Staff Director	\$188,697	-0.45%	Staff Assistant	\$66,153	14.19%
Digital Director	\$89,387	5.96%	Staff Director	\$189,309	-1.98%
General Counsel	\$186,223	2.56%	Subcommittee Staff Director	\$149,111	-5.74%

**Source:** *Statement of Disbursements of the House*, as collated by LegiStorm, various years, and CRS calculations. 2021 median pay provided in constant 2022 dollars.

Report tables provide aggregate statistics on pay for each staff position for 2001, 2007, 2012, and 2017-2021, including quartiles, median pay, and average pay, based on available data. Graphic displays are also included, providing representations of pay from the following two perspectives:

- a line graph showing change in median pay, 2001-2021, in nominal (current) and constant 2022 dollars; and
- distributions of 2021 pay in constant 2022 dollars, in \$10,000 increments.

Other data, which may not represent the entire 2001-2021 period, are available to congressional staff upon request.

The Congressional Research Service provides a number of products on staffing issues. These can be found in CRS Report R44688, *Congressional Staff: CRS Products on Size, Pay, Job Tenure, and Duties*.

## Introduction

Levels of pay for congressional staff are a source of recurring interest among Members of Congress, congressional staff, and the public. In House committees, the chair and ranking member set the terms and conditions of employment for majority and minority staff, respectively. This includes job titles and descriptions; rates of pay, subject to maximum levels;<sup>1</sup> and resources available to carry out their official duties. There may be interest in congressional pay data from multiple perspectives, including assessment of the costs of congressional operations; guidance in setting pay levels for staff in committee offices; consideration by staff when negotiating compensation for a new position or promotion; or comparison of congressional staff pay levels with those of other federal government pay systems.

Publicly available information sources do not provide aggregated congressional staff pay data in a readily retrievable form. Pay<sup>2</sup> information in this report is based on the House *Statement of Disbursements* (SOD), published quarterly by the Chief Administrative Officer,<sup>3</sup> as collated by LegiStorm, a private entity that provides some congressional data by subscription.<sup>4</sup> Data in this report are based on official House reports, which afford the opportunity to use consistently collected data from a single, authoritative source. Additionally, this report provides annual data, which allows for observations about the nature of House committee staff compensation over time.

This report provides pay data for 14 staff position titles that are used in House committees, and for which sufficient data could be identified. The positions include the following:

Chief Counsel	Digital Director	Senior Professional Staff Member
Clerk	General Counsel	Staff Assistant
Communications Director	Minority Professional Staff Member	Staff Director
Counsel	Professional Staff Member	Subcommittee Staff Director
Deputy Staff Director	Senior Counsel	

When committees had more than two staff members with the same job title, data for no more than two staff per committee were collected. House committee staff had to hold a position with the same job title in the same committee for the entire year examined, and not receive pay from any other congressional employing authority for their data to be included. Every recorded payment ascribed in the LegiStorm data to those staff for the year is tabulated. Data collected for this report may differ from an employee's stated annual salary due to the inclusion of overtime, bonuses, or other payments in addition to base salary paid in the course of a year.<sup>5</sup>

<sup>1</sup> Effective September 1, 2022, the maximum annual pay for staff in House committees, a figure that has increased over time, is \$203,700. A minimum salary of \$45,000 per year was also established for the first time. See *Order of the Speaker of the House of Representatives*, May 6, 2022, set out as a note following 2 U.S.C. 4532. Maximum payable rates for House committee staff since 2001 are available in **Table 2**.

<sup>2</sup> In this report, pay refers to monies paid by the House to staff, and excludes other components of total compensation, which might include paid leave or employer contributions to various insurance and retirement benefits.

<sup>3</sup> Volumes of the *Statement of Disbursements* since July 2009 are available at <http://disbursements.house.gov/>.

<sup>4</sup> <http://www.legistorm.com/>.

<sup>5</sup> Other forms of payment do not appear to be recorded in a consistent manner. Sometimes overtime and other pay is listed as separate entries and in other instances, significant one-time changes in a quarterly total may suggest payments in addition to regular salary.

## Data Concerns

Data presented here are subject to some challenges that could affect findings presented or their interpretation. Some of the concerns include the following:

- Given the large number of positions in committees with titles held by one House employee, data provided here almost certainly do not represent all of the jobs carried out by House committee staff.
- The manner in which staff titles are assigned might have implications about the representativeness of the data provided. Of positions for which data were collected, two broad categories emerge. The first category identifies position titles that usually appear to apply to one staff member per committee.<sup>6</sup> Since almost all available data were collected for those positions, pay information provided is likely to be highly representative of what House committees pay staff in those positions. The second category includes positions for which committees might hire two or more staff members.<sup>7</sup> Since pay data were collected for no more than two staff per committee for each position, it is more likely that data for those positions are a sample of staff in those positions rather than nearly complete data. Those data may be less closely representative of what all staff in those positions are paid.
- Pay data provide no insight into the education, work experience, position tenure, and full- or part-time status of staff, or other potential explanations for levels of compensation.
- Differences might exist in the job duties of staff in positions with the same title. Aggregation of pay by job title rests on the assumption that staff with the same title carry out the same or similar tasks. Given the wide discretion congressional employing authorities have in setting the terms and conditions of employment, there may be differences in the duties of similarly titled staff that could affect their levels of pay.

## Data Tables and Visualizations

Tables in this section provide background information on House pay practices, comparative data for each position, and detailed data and visualizations for each position. **Table 2** provides the maximum payable rates for House committee staff since 2001 in both nominal (current) and constant 2022 dollars.

Constant dollar calculations throughout the report are based on the Consumer Price Index for All Urban Consumers (CPI-U), various years, expressed in 2022 dollars.<sup>8</sup>

---

<sup>6</sup> Positions that typically employ one staff member per committee include communications director, deputy staff director, minority staff director, and staff director.

<sup>7</sup> Positions that typically employ two or more staff members per committee include counsel, staff assistant, and professional staff member.

<sup>8</sup> U.S. Department of Labor, Bureau of Labor Statistics, *Consumer Price Index*, at <https://data.bls.gov/timeseries/ CUUR0000SA0>.

**Table 3** provides 2021 pay levels in median pay in constant 2022 dollars and percentage changes for each of the 14 positions; for Members of Congress;<sup>9</sup> and for salaries paid under the General Schedule in Washington, DC, and surrounding areas and in the Rest of the United States (RUS) area.<sup>10</sup>

**Table 4** through **Table 17** provide available tabular pay data for each staff position for 2001, 2007, 2012, and 2017-2021, including data distributed by quartile, median pay, and average pay. The numbers of staff for which data were counted are identified as “#” in the data tables. Staff pay tables also provide a comparison, at various intervals to 2021, based on data availability, of the cumulative percentage change in median pay for that position, in constant, 2022 dollars.

Graphic displays are also included for each position, providing representations of pay from the following two perspectives:

- distributions of 2021 pay in constant 2022 dollars, in \$10,000 increments; and
- a line graph showing change in median pay, 2001-2021 (or available data), in nominal (current) and constant 2022 dollars.

## House Committee Staff Pay Tables

### Interpreting Pay Tables: Statistics Describing Pay Data

For each year that data are available, statistical values for staff positions are included in **Table 4** through **Table 17**, including the following:

Minimum & Maximum	The smallest and largest pay level, respectively, for each position
Average (Mean)	The mean is the average of a list of numbers, in which the sum of all the values is divided by the total number of values. For example, if three salaries, \$30,000, \$45,000, and \$90,000, were identified for a given staff position, the average (mean) would be $(\$30,000 + \$45,000 + \$90,000) \div 3 = \$55,000$ .
Median	The midpoint at which half of the numbers in a list are higher and the other half lower. For example, if three salaries, \$30,000, \$45,000, and \$90,000, were identified for a given staff position, the midpoint (median) would be \$45,000.
Statistical Quartiles	Statistical values that divide data into quarters for more detailed analysis. In a list of numbers, Quartile 1 (Q1) is a number that falls in the middle between the lowest number, or minimum, and the median. For example, if Q1 for a given staff position was \$50,000, this would indicate that 25% of employees in that position make \$50,000 or less. Quartile 2 (Q2) is also the median. Quartile 3 (Q3) is a number that falls in the middle between the median and the highest number in the list, or maximum. Numbers between Q1 and Q3 compose the interquartile range, the difference between the largest and smallest values in the middle 50% of a list of numbers. Quartiles might also be described as percentiles, as shown below.

<sup>9</sup> Member pay data are taken from CRS Report 97-1011, *Salaries of Members of Congress: Recent Actions and Historical Tables*.

<sup>10</sup> General Schedule pay change is based on changes in pay levels, and not the pay of individuals. General Schedule pay tables for various years are available at <https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/>. For a complete description of areas covered under the Washington-Baltimore-Northern Virginia, DC-MD-VA-WV-PA and RUS locality pay tables in 2022, see <https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/2022/locality-pay-area-definitions/>.

Statistical Measures Used in Pay Tables					
Minimum	Quartile I (Q1)	Quartile2 (Q2) Median	Quartile3 (Q3)	Maximum	Average
Lowest number in a list	25 <sup>th</sup> Percentile 25% of staff make less than Q1	50 <sup>th</sup> Percentile 50% of staff make less than Q2	75 <sup>th</sup> percentile 75% of staff make less than Q3	Highest number in a list	The mean, or number expressing the central value in a set of data
	Middle number between Minimum and Median	Median—midpoint at which half of the numbers in a list are higher and the other half lower	Middle number between Median and Maximum		
	Lower Quartile	Interquartile Range = Q3-Q1	Upper Quartile

# Learn how Capitol Hill really works

**All of our programs and any combination of their topics can be tailored for custom training for your organization.**

For more than 40 years, TheCapitol.Net and its predecessor, Congressional Quarterly Executive Conferences, have been teaching professionals from government, military, business, and NGOs about the dynamics and operations of the legislative and executive branches and how to work with them.

Our training, on-site and online, and publications include congressional operations, legislative and budget process, communication and advocacy, media and public relations, research, testifying before Congress, legislative drafting, critical thinking and writing, and more.

- **Diverse Client Base**—We have tailored hundreds of custom on-site and online training programs for Congress, numerous agencies in all federal departments, the military, law firms, lobbying firms, unions, think tanks and NGOs, foreign delegations, associations and corporations, delivering exceptional insight into how Washington works.™
- **Experienced Program Design and Delivery**—We have designed and delivered hundreds of custom programs covering congressional/legislative operations, budget process, media training, writing skills, legislative drafting, advocacy, research, testifying before Congress, grassroots, and more.
- **Professional Materials**—We provide training materials and publications that show how Washington works. Our publications are designed both as course materials and as invaluable reference tools.
- **Large Team of Experienced Faculty**—More than 150 faculty members provide independent subject matter expertise. Each program is designed using the best faculty member for each session.
- **Non-Partisan**—TheCapitol.Net is non-partisan.
- **GSA Schedule**—TheCapitol.Net is on the GSA Schedule for custom training: GSA Contract GS02F0192X.

Please see our Capability Statement on our web site at [TCNCS.com](http://TCNCS.com).

Custom training programs are designed to meet your educational and training goals, each led by independent subject-matter experts best qualified to help you reach your educational objectives and align with your audience.

As part of your custom program, we can also provide online venue, classroom space, breaks and meals, receptions, tours, and online registration and individual attendee billing services.

For more information about custom on-site training for your organization, please see our web site: [TCNCustom.com](http://TCNCustom.com) or call us: 202-678-1600, ext 115.
